

# COMMERCIAL TANKPAK SERIES 2 & SOLAR

## ICC SYDNEY – DARLING HARBOUR, SYDNEY - NSW

The revamped, \$1.5 billion ICC Sydney at Sydney's Darling Harbour is Asia Pacific's premier integrated convention, exhibition and entertainment precinct. It's a striking contemporary development widely regarded as a beacon of innovation, learning and entertainment.

Incorporating a total exhibition capacity of 35,000 square metres, the world-class facility includes convention facilities capable of hosting three separate events concurrently, as well as a premier 8000 capacity red carpet theatre. It also offers a total of 8,000 square metres of meeting room space across 70 rooms and features world's best practice technology throughout.

### Solution

Rheem supplied eight commercial hot water plants that were used to service the theatre, convention and exhibition centres.

### Hot Water Package

- 7 x Rheem Tankpak (consisting of high-efficiency commercial continuous flow gas water heaters manifolded together with commercial buffer storage tanks).
- 1 x Rheem Raypak gas heater system with commercial buffer storage tanks.
- 1 x commercial Solar pre-heat system (used in the convention centre to offset gas consumption).

## FACTS & FIGURES

The eight commercial hot water plants provide over 60,000-litres of 65°C water over a one-hour peak period.

Developer: Lend Lease

Hydraulic Consultant: CJ Arms

Installing Contractors: Boone & Willard and Browne & Moodie
